Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-47, drawn to a transfer fixing apparatus, classified in class 399.
 - II. Claim 48, drawn to record medium recycling method, classified in class 399, subclass 1.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as recycling a record medium that is imaged using a separate transfer device and fixing device. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Species

4. This application contains claims directed to the following patentably distinct species of the claimed invention (Invention I).

Species I: Figures 2, 3 and 9-12B; control of a distance between the transfer fixing member and intermediate transfer member and control of the drive for the transfer fixing member.

Species II: Figures 4-8; bias application device for the intermediate transfer member.

Art Unit: 2852

Species III: Figures 13 and 14; heater placement to reduce influence of heat on the intermediate transfer member.

Species IV: Figures 15-22; device to dampen vibrations during final image transfer.

Species V: Figures 23 and 24; electrostatic transfer roller.

Species VI: Figures 25 and 26; final transfer nip direction.

Species VII: Figures 27-35, and 40-46; transfer fixing member heating device.

Species VIII: Figures 36, 37 and 51; placement of transfer fixing device with respect to the intermediate transfer member.

Species IX: Figures 38 and 39; preheater for a record medium.

Species X: Figure 47; changing of a final nip width.

Species XI: Figures 48A-49B; order of colors transferred.

Species XII: Figure 50; modular transfer fixing unit and heating unit.

Species XIII: Figure 52; roller which both drives intermediate transfer belt and feeds recording medium.

Species XIV: Figure 53; composition of a transfixing roller.

If applicant elects Invention I, then Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2852

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
